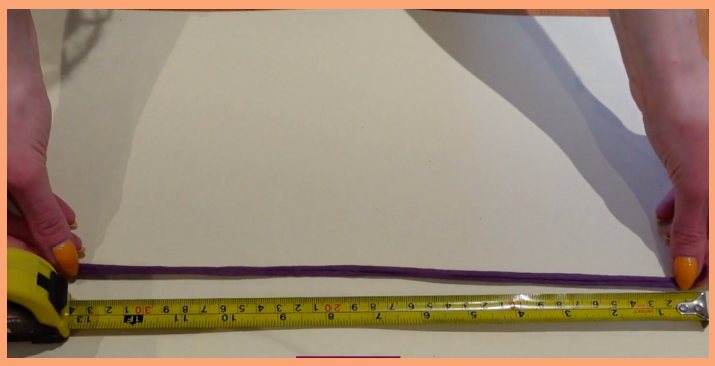
STEP BY STEP: MACRAME SNOWFLAKE



Step 1 - Measure out 18 x 13 inch strips of your chosen cord/yarn.

Step 2 - Fold your yarn in half then feed the loop through the hoop, pulling the bottom strands through, forming a lark's head knot.

Step 3 - Continue to do this for all your pieces of yarn. Then separate your yarn into groups of 3 forming 6 'points' of your star.

Step 4 - Put your 2 outside strands to the side. Take the next strands along and start your square knot by making a '4' shape.

STEP BY STEP: MACRAME SNOWFLAKE

Step 5 - Loop the right hand cord underneath the middle pieces and pull through.

Step 6 - Mirror the same on the other side. Instead of a '4' shape, make a 'P' shape.

Step 7 - Take the outside strand and bring it over the strand next to it.

Step 8 - Loop the second strand through like shown and repeat this 2 times on each piece on the right side.

STEP BY STEP: MACRAME SNOWFLAKE

Step 9 - Repeat the same on the other side.

Step 10 - When you come to the bottom 2 strands, fold the right strand over the left and knot twice.

Step 11 - Continue to use the same technique for all your 'points.'

Step 12 - Cut off the ends to your desired size. If you are using macrame cord, you can comb out the ends. You now have your snowflake!

Feedback and Learning

Thursday 3rd December 2020

Quick Facts

Every Christmas, the amount of waste produced in the U.K. increases 30 percent, according to a study by waste management company Biffa. That includes an estimated 365,000 kilometers of unrecyclable wrapping paper — enough to wrap around the equator nine times — and 1 billion cards that end up in the bin.(Politico, 2019).
