

# SECURE A BETTER FUTURE AS A JAMES FREW ELECTRICAL APPRENTICE

## The Opportunity

An electrical installation apprenticeship is a Modern Apprenticeship where apprentices receive training in all aspects of electrical installation. Modern Apprenticeships are a combination of work-based training and college learning. Over the course of your 4-year apprenticeship, you will work to achieve an SVQ3 in Electrical Installation.

Apprentices at James Frew are critical to the success of the company. They receive the very best in all aspects of on and off-the-job training in electrical installation. They earn while they learn and are ambassadors for James Frew Ltd.

Our apprentices make the most of opportunities to develop their technical skills, their communication skills and their problem solving skills.

The apprenticeship involves off-the-job training at one of our college partner institutions and on-the-job training working on our contracts. The work experience will take place at various locations and a degree of travel will be required.

Our apprentices always act in the best interests of the company and understand that only the best will do.

## Do you have what it takes to be a James Frew apprentice?

We will provide a company uniform and full PPE.

You will be mentored by an experienced electrician to ensure that you make the most of the experience.

On completion of the programme, you will have an opportunity to join the company as a fully qualified electrician with great career prospects and access to career long professional learning.

As a company, we value our young workforce. 15% of our workforce are current apprentices and over a third of our people have served a recognised apprenticeship.

## Entry Requirements

- All applicants will have achieved National 4 or equivalent in Maths, English, Science and/or a technical subject.
- Must have a "Can Do" attitude and be determined to succeed.
